

FD1¹ Advanced IP Law & Practice Goodall/Lee: **Course Description**

Course summary

This intensive 1.8 day revision course is designed to help prepare trainee patent attorneys for the Final Diploma (FD) Advanced IP Law & Practice paper. The Examination Guidance describes FD1 as a test of *“the competence to properly advise and act for a client in any matter relating to the preparation, prosecution, exploitation and enforcement of patent rights in the UK and via the EPC and PCT. Knowledge of the basic patent law in major countries (notably the USA and Japan) is also required.”* Participants are expected to have underpinning knowledge of the relevant law, built up from Foundation Certificate and subsequent study, practical experience and prior learning.

The underpinning knowledge will be reviewed, with the main emphasis of the course being practical and focused on the competencies that FD1 tests. There will be advice from the tutors on examination technique, including how to analyse questions and present answers appropriately. The application of knowledge and technique will be illustrated by discussion of the most recent past paper, before an opportunity for supervised group, small group and finally individual work in which participants can practise and receive feedback from the tutors on previously unseen past exam questions.

Participants may complete the most recent past paper in advance of the course and receive feedback on their answers.

Content

Each session contains a session title, session summary and set of learning outcomes. The learning outcomes of the sessions have been mapped to the tested competencies set out in the **FD1 Syllabus**.

¹ Formerly the P2 paper.

Pre-course preparation

Summary

Annexe B provides guidance on preparing for the course and the later exam. Participants will be asked to read the FD1 Syllabus and answer the previous year's examination paper. They will also need to revisit and build on their Foundation knowledge of the relevant sections of the acts, rules and treaties in the FD1 Syllabus. The better prepared each participant, the more the individual – and the group – will get out of this intensive course.

Expected learning outcomes

Upon completion of pre-course preparation, participants should be able to:

- describe the scope of the FD1 Syllabus and the knowledge and competencies required;
- understand the format of the exam, including the number and types of questions that need to be answered, and the exam instructions and regulations;
- as far as possible, have the level of practical experience set out on pages 2-3 of the Examination Guidance; and
- recall and describe the areas of law and practice that are tested in FD1.

Session 1: Tour of the Act

Session summary

In this session, the tutors provide, through oral quick-fire questions and associated discussion, an overview of the key parts of law that are tested in the FD1 paper. Summary handouts are provided on specific topics, including groundless threats (s. 70), formalities deadlines and designs.

Expected learning outcomes

At the end of this session, participants will be able to discuss and explain the key aspects of law with which a person advising clients on UK matters needs to be familiar – novelty, priority, inventorship/ownership, freedom to operate, licences/licence arrangements, infringement (including contributory infringement), enforcement (including threats and injunctions), filing strategy (interaction of EPC, PCT and National Filing) and validity/revocation.

Session 2: Exam Technique

Session summary

In this session, participants will receive advice from the tutors on:

- the different types of questions/problems posed;
- the Examiner's expectations in terms of a good FD1 answer;
- managing time efficiently and organising answers to maximise marks;
- identifying the most important topics; and
- creating a checklist to assist when considering answers.

Expected learning outcomes

At the end of this session, participants will be able to:

- identify what the Examiner expects in an answer – application of understanding of law and practice to the question by means of structured analysis and reasoned, balanced discussion, producing practicable advice that meets the client's needs; and
- recognise how to best structure answers and manage time pressures – organising answers, not getting distracted by peripheral issues and not overrunning on individual answers.

Session 3: Past Paper Review

Session summary

In this session, participants will review the most recent past paper. Participants are asked in turn to discuss potential legal issues arising from the questions, with tutors prompting, challenging and inviting additional comments from other participants as appropriate, to help develop skills in identifying legal issues and clearly explaining them. After each question has been discussed, the structuring of a suitable answer and appropriate conclusions will be considered. The objective is not to teach participants how to pass the most recent past paper, but to develop a general strategy for approaching any question of any paper in an analytical and systemic manner.

Expected learning outcomes

At the end of this session, participants will have some understanding of how examination technique and legal knowledge come together in preparing answers. Participants will be starting to demonstrate the key FD1 competencies:

- analysing and assimilating information set out in the question/problem to see the overall picture and extract the key issues;
- evaluating risks and proposing mitigating actions;
- generating logical, considered and effective proposals based on balanced analysis of information, risk and costs;
- identifying further information or evidence needed, but where necessary proposing actions on the basis of limited information, including appropriate consideration of alternatives available;
- exploiting knowledge of law and practice in advising clients in dealings with the Patent Office, foreign associates and persons from other professions;
- communicating clearly to persuade, advise and inform;
- providing advice that is practicable and achievable, while reflecting the client's needs and priorities.

Session 4: Blind Questions – Small groups

Session summary

In this session, participants will address previously unseen questions in small groups to promote contributions by all individuals. Tutors will move between groups to prompt and challenge. After discussion within the groups, a general review of each question will be undertaken and the structuring of a suitable answer and appropriate conclusions considered.

Expected learning outcomes

At the end of this session, participants will have:

- reinforced the required legal knowledge;
- gained confidence in their analysis of questions;
- improved their ability to structure answers.

Session 5: Blind Questions – Individual work

Session summary

In this session, participants will address previously unseen questions individually, before a general discussion on how the answer should be approached.

Expected learning outcomes

At the end of this session, participants will have

- reinforced the required legal knowledge;
- gained confidence in working independently to analyse a question and structure an answer.

Session 6: Final Questions

Session summary

In this session, participants will be able to raise any topics about which they remain unclear.

Teaching will be through direct responses to participant queries. Where possible, relevant examples from past papers will be used to illustrate the points made.

Expected learning outcomes

At the end of this session, participants will have solidified their legal knowledge and be confident in addressing questions across the full syllabus in a manner which demonstrates their competency to practise.

Session 7: Summary, Evaluation and Final Preparations for the FD1 Exam

Session summary

In this closing session the tutors will summarise key points of advice on tackling the FD1 exam and structuring answers for maximum impact. Participants will be asked to complete evaluations on the content of the course, delivery and achievement of expected learning outcomes. The tutors will then advise participants on making best use of the remaining weeks before the exam to prepare – with guidance on further practice of past exam papers and on materials to read.

Expected learning outcomes

At the end of this session, participants will be able to:

- recall the key pieces of advice from the tutors on how to tackle FD1 and structure answers;
- plan their final stages of revision and practice for the exam; and
- identify areas in which further reading and practice is required.

ANNEXE B

HOW TO PREPARE FOR FD1 AND THE COURSE

A. General preparation for FD1

1. Read and familiarise yourself with the FD1 Syllabus to understand:

- which areas of the law you are expected to know;
- what you will have to demonstrate in the exam to show that you have the required knowledge and skills; and
- what practical experience it is helpful for participants to have.

The syllabus is available from the Patent Examination Board (PEB) website.

2. Seek out opportunities in your office to obtain the recommended practical experience set out on pages 2-3 of the Examination Guidance.

Discuss this with your training supervisor/line manager.

3. Familiarise yourself with the format and requirements of the exam.

- Exam papers are available online on the PEB website, but please don't attempt the 2015 paper (or read the examiner's comments on it at this stage) as you will be required to answer it in pre-course work.

4. Build on your notes from Foundation Certificate to ensure you are up to date on the areas of law and practice that are set out in the FD1 Syllabus and tested in the exam. Suggested reference sources include:

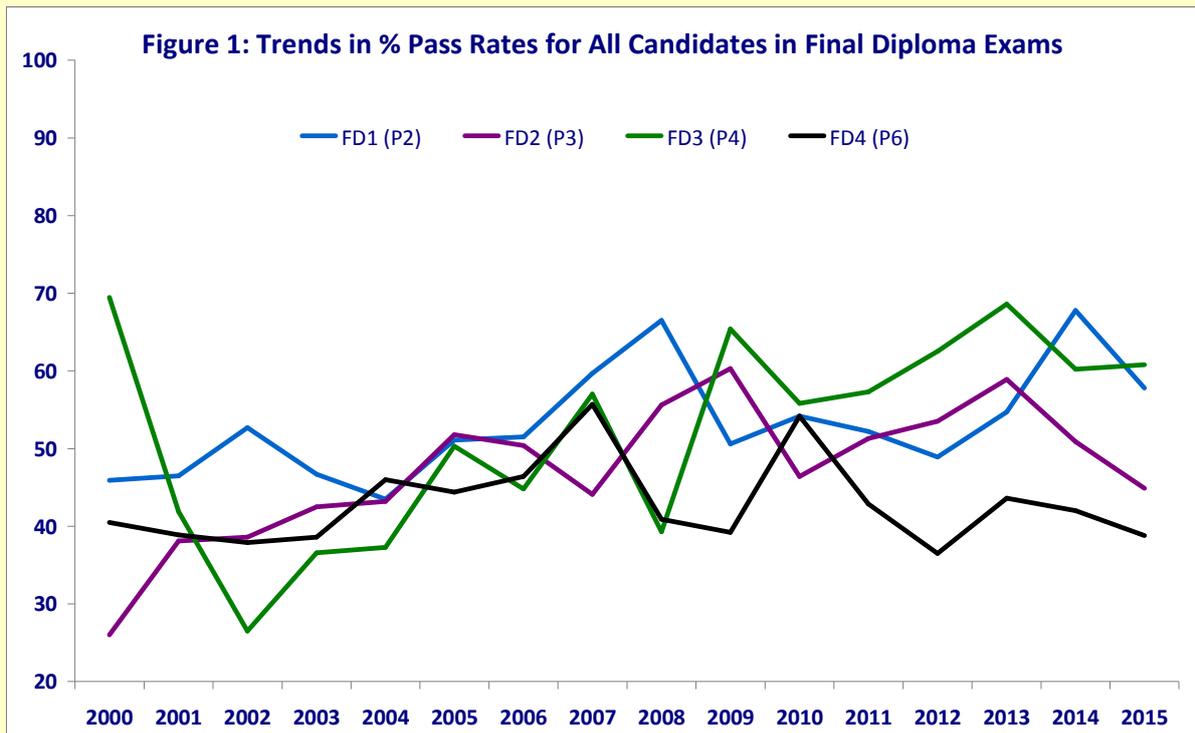

- **UKIPO Manual of Patent Practice.** *Available from the UKIPO website.*
- **PCT Applicant's Guide.** *Available from the WIPO website.*
- CIPA's ***The Patents Training Manual***, chapters 9, 10 and 13-16. *Available from CIPA.*
- Doug Ealey's ***Study Guide to the Patents Act*** (latest edn.). *Available from CIPA.*
- ***CIPA Guide to the Patents Act*** ('Black Book': latest edn, and supplement) – the key reference book.
- ***CIPA Informals lectures*** in the Informals area of the CIPA website.
- Also see the suggested reading set out at the end of the FD1 Syllabus

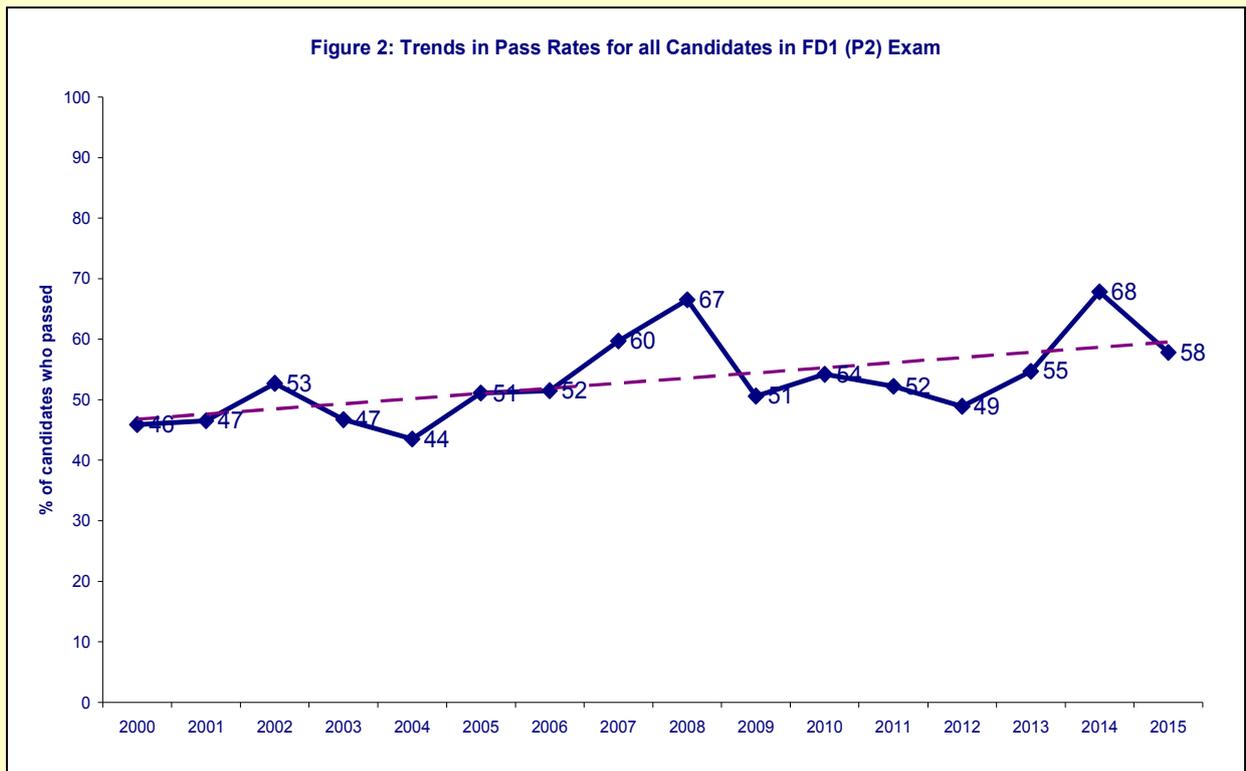

B. Specific preparation for this course

5. Answer the pre-course questions which the tutors will set – we will advise you of these at least 4-6 weeks before the course date.

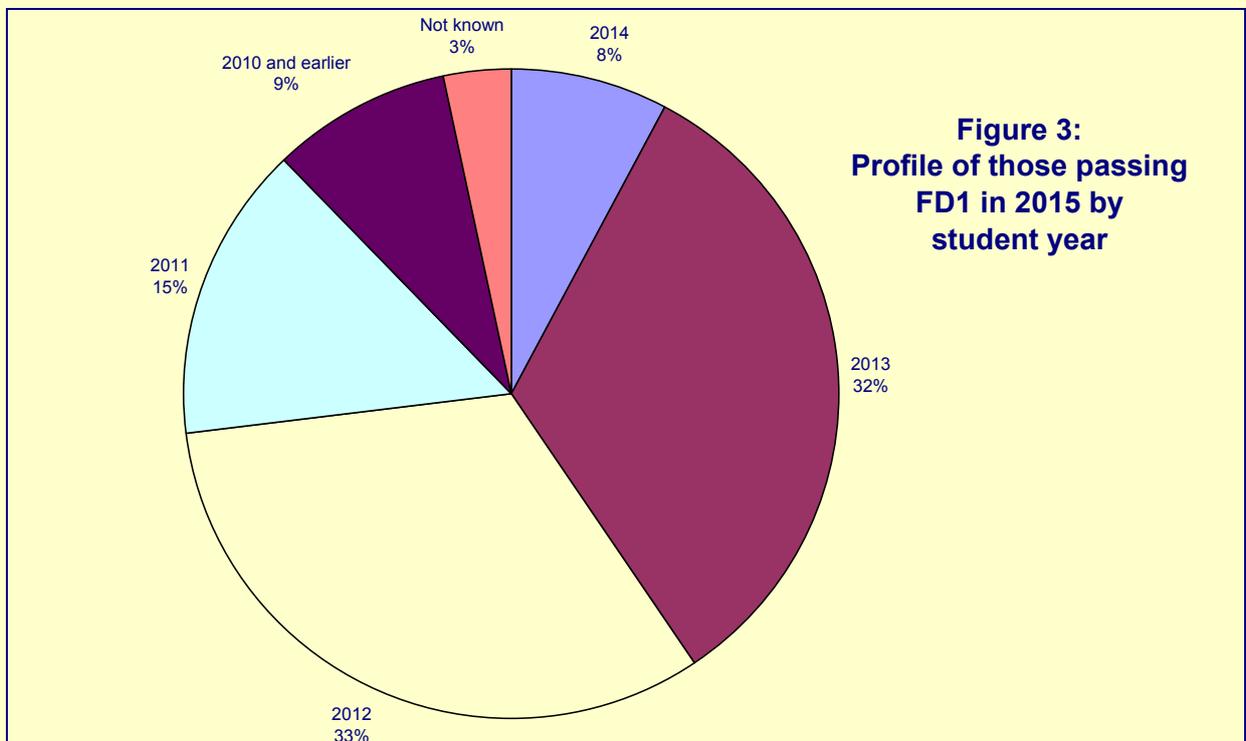

ANNEXE C: TRENDS IN OVERALL PASS RATES FOR FD1 (P2)

Figure 1, drawing on PEB data for all candidates, indicates that, since 2000, the pass rate for FD1 (P2) has fluctuated substantially year to year: from a low of 44% in 2004 to a high of 68% in 2014. **Figure 2** indicates that the linear trend for passing has been gradually upwards from 46% in 2000 to 58% in 2015. The mean pass rate over the period 2000-15 was 53% as against 47% for FD2 (P3), 52% for FD3 (P4) and 43% for FD4 (P6).

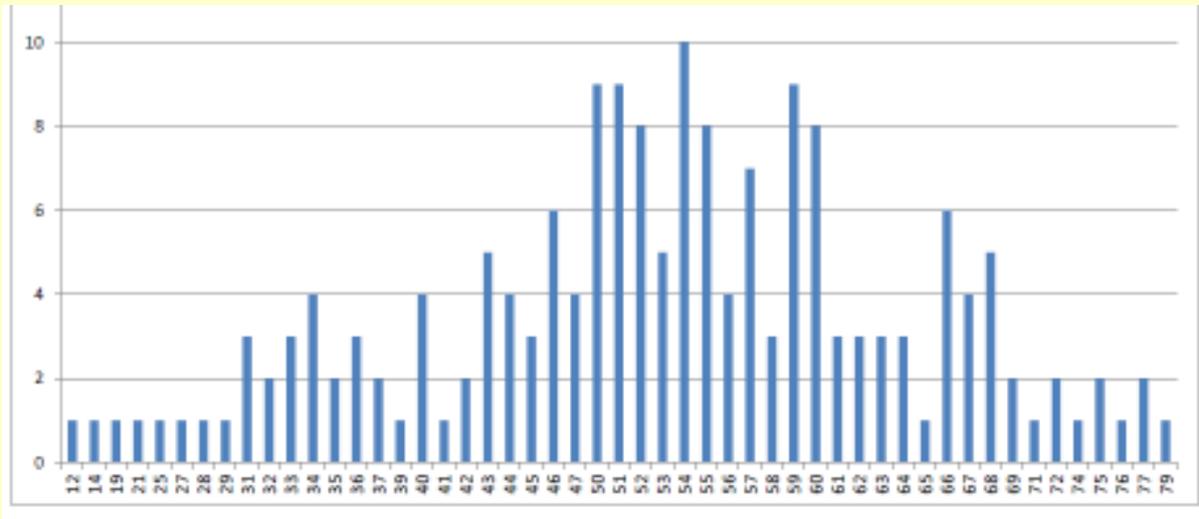

Our analysis (**Figure 3**) indicates that 60% of those who passed FD1 in 2015 had been students in the profession for more than two years.

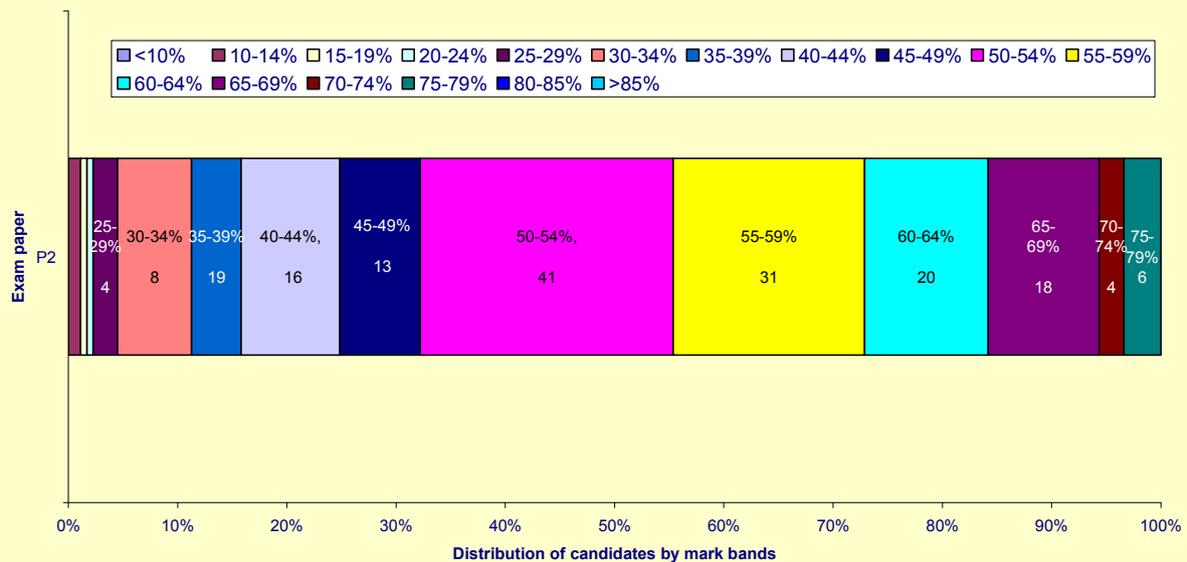

In 2014, the PEB published (**Figure 4**) the distribution of marks for all the candidates who took the FD1 (P2) exam.

Figure 4: The mark distribution of FD1 (P2) exam candidates in 2014

This was the first year PEB has published this information, so we do not whether this mark distribution is typical. But analysis of the marks indicates that, 71, or 40% of all candidates secured marks of between 43 and 55, while 41 candidates (23% of all) were “narrow passes”, with marks of 50 to 54, and 13 (7%) were ‘narrow fails’, with marks of 45 to 49 (see **Figure 5**).

Figure 5: Distribution of Candidates' Marks in 2014 P2 Exam (177 candidates)

This points to the importance of candidates ensuring that candidates maximise all possible marks available, as one or two marks can make the difference between a pass and a fail.
